Our first compilation album, 'Digital Progression' is an 11 track exploration of our progressive sound, and a chance to preview some of our upcoming releases. It's coming out in late November accompanied with this continuous mix from the EVE DJs.

As a label, EVE Records has a longevity and consistency that is second to none. Since its first release 16 years ago it has launched the careers of many of the industries pioneers including of course the classic early **Pablo Gargano** releases.

The music policy has always been more about quality than genre and this new compilation series once again blurs the boundaries between progressive, techno and house delivering a uniquely flavoured mix.

Shiloh, Quivver, Martin Roth, G-Tek, D-Nox & Beckers, all side by side with the best of the emerging new talent from the EVE Records stable and beyond.

Welcome to the next chapter in the EVE Records story.

Recoverworld is the home of Discover, Discover Dark, Flux Delux, EVE Records and Recover.
